1. User Authentication & Profiles

Account Registration/Login:

Email, phone, or social media integration.

Email verification and password recovery options.

Profile Management:

Update personal information, profile picture, and contact details.

Manage preferences and saved searches.

2. Property Listings

Detailed Listings:

Comprehensive details: photos, videos, price, location, description, amenities, property type, and size.

Contact information of the agent/owner.

Filtering and Search:

Advanced filters: location, price range, property type, number of bedrooms/bathrooms, amenities, pet-friendly, furnished, etc.

Keyword search functionality.

Map Integration:

Interactive map with property markers.

Geographical context, nearby amenities, and public transportation.

3. Communication Tools

In-App Messaging:

Direct communication between buyers/sellers and renters/landlords.

Message notifications and history.

Push Notifications:

Alerts for new listings, price changes, messages, and appointment reminders.

4. Booking & Scheduling

Property Viewing Appointments:

Schedule visits or virtual tours.

Calendar integration for appointment management.

Booking System:

For rental properties: a system to book or apply for rental agreements.

Notification of booking status.

5. Payment Integration

Secure Payments:

Options for deposits, rent payments, and property purchases.

Integration with payment gateways like PayPal, Stripe, or bank transfers.

Financial Tracking:

Track payment history and upcoming dues.

Automated reminders for due payments.

6. User Reviews & Ratings

Property Reviews:

Feedback from previous renters or buyers.

Rating system for properties.

Agent/Landlord Reviews:

Ratings and reviews for property managers or landlords.

Review moderation to ensure authenticity.

7. Document Management

Upload & Store Documents:

Secure storage for lease agreements, purchase contracts, and IDs.

Easy document retrieval.

Digital Signatures:

Facilitate electronic signing of agreements and contracts.

Integration with e-signature services.

8. Analytics & Reporting

Market Trends:

Insights on property market trends, average prices, and demand.

Graphical representation of data.

User Analytics:

Data on user behaviour to personalise recommendations.

Track user engagement and preferences.

9. Integration with External Services

Map Services:

Integration with Google Maps, Apple Maps, or similar for location and navigation.

Payment Gateways:

Integration with services like PayPal, Stripe, or bank transfers for secure transactions.

10. Support & Assistance

Customer Support:

In-app chat, email support, or help centre for user assistance.
Support ticket system for issue tracking.

FAQs and Guides:

Resources to help users navigate the app and understand the property process.
Step-by-step guides and video tutorials.

11. Security Features

Data Encryption:

Protect user data and transactions with encryption.
Secure communication channels.

Two-Factor Authentication:

Additional security for account access.
Verification via SMS or authentication apps.

Advanced Features (Optional)

1. Augmented Reality (AR):

Virtual Tours: AR capabilities for users to take virtual tours of properties.

2. AI Recommendations:

Property Suggestions: AI-driven recommendations based on user preferences and behaviour.

3. Integration with Local Services:

Information on local utilities, schools, hospitals, and other services.

4. Social Sharing:

Share Listings: Options to share property listings via social media or messaging apps.

5. Custom Notifications:

Personalised Alerts: Customizable alerts based on user-defined criteria (e.g., price drops, new listings).
